**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

*Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barnes, U.K. Patent Application GB 2,064,263 A.

Regarding claim 1, Barnes discloses a gasket (4) for use with a microphone (3), comprising: at least one tube (42) for receiving said microphone and for directing sound thereto, said tube giving rise to acoustical response for said microphone; and a perforated membrane (44) within said tube for modifying the acoustical response of said microphone (See Figs. 1 and 2 and lines 53-129). Barnes does not expressly disclose said membrane is integrally molded within the tube. However, Figure 1 clearly illustrates a one piece construction of said tube and membrane

Art Unit: 2643

and it would have been obvious to one of ordinary skill in the art at the time of the invention to mold such one piece construction for low cost and efficient mass production.

Regarding claim 2, Barnes further discloses said perforated membrane is located adjacent said microphone (See Figs. 1 and 2).

Regarding claim 3, Barnes does not expressly disclose a plurality of holes distributed evenly across said membrane. However, multiple hole membranes are well-known in the art and membranes with no holes, single holes or multiple holes all provide varying acoustical responses. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide multiple holes for varying the acoustical response of the membrane.

#### ***Allowable Subject Matter***

Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Ensey whose telephone number is 703-305-7363. The examiner can normally be reached on Mon-Fri: 8:00 - 4:30.
